I operate and evolve secure cloud platforms supporting production systems, AI/ML workloads, and emerging agentic AI applications. I have operated Kubernetes-based platforms supporting 60+ microservices, contributing to DevSecOps automation, CI/CD pipelines, cloud security practices, and RAG workflows to enable reliable, secure, and scalable software delivery.

Key areas of focus:

- Platform engineering and Kubernetes-based infrastructure
- DevSecOps, CI/CD, and cloud-native automation
- Cloud security and data protection for distributed systems
- AI/ML and agentic AI infrastructure (Kubeflow, RAG)
- Data Security Posture Management (DSPM)

Core Skills

- Cloud Architecture, DevSecOps, SRE, Kubernetes, Docker
- AI/ML, GenAI, LLM pipelines, MLOps, RAG, Agentic AI
- CI/CD, Distributed Systems, IoT Platforms
- Observability, AIOps, SIEM, Incident Response
- Data Pipelines, Feature Engineering, Model Deployment
- Secure Software Development, Python

Self-Directed Professional Development

- IBM Generative AI Engineering (In Progress)
- PGP Data Science & Business Analytics
- AI & Deep Learning Specialization
- Applied DSPM Series (5 public GitHub repos with end-to-end pipelines and validation artifacts)

Professional Experience

IBM | Sr Backend Engineer | 2021-2025

- Owned and operated 60+ Kubernetes-based microservices, enabling telemetry-driven monitoring and automated remediation
- Strengthened CI/CD via Kubernetes + Tekton pipelines with IAST/SAST/DAST (SonarQube, Mend)
- Built 200+ Python automation tests from scratch to improve CI/CD reliability; collaborated on Ansible automation.
- Led vulnerability management incl. PCE, patching, bi-weekly prioritization
- Achieved ~85% reduction in vulnerability backlog (200+ → 30) over 6 months by leading prioritized patching and partnering with Security teams.

Exabeam | Sr Software Quality Engineer | 2019-2021

- Led reliability engineering; built automation for detection pipelines

Oracle OCI | Principal Software Engineer | 2018-2019

- Architected multi-tenant cloud infrastructure

Light | Sr Software Quality Engineer | 2017-2018

- Validated computational photography systems

Silver Spring Networks | Sr SDET | 2012-2017

- CI frameworks for IoT (23M+ devices); improved stability

Earlier Experience: Redwood, CDNetworks, Vusion, HP, Motorola, Brocade, Xoriant, DSS Infotech

Certifications

DSPM Architect (Cyera) 2026 | Kubeflow (Linux Foundation) 2025

Education

Master of Computer Management (MCM), Savitribai Phule Pune University, India
