

Neeraj Sharma

Principal Platform Engineer | Platform Engineering, DevSecOps, Kubernetes | AI/ML Infrastructure & Cloud Security | KubeFlow, DSPM

Milpitas, CA | mail4neeraj@gmail.com | 669-241-2101

LinkedIn: [linkedin.com/in/neeraj](https://www.linkedin.com/in/neeraj) | GitHub: github.com/neeraj-sharma-0 — Complete resume, 1-page snapshot, and PGDSBA & AIDL ePortfolio PDFs

I operate and evolve secure cloud platforms supporting production systems, AI/ML workloads, and emerging agentic AI applications.

I have operated Kubernetes-based platforms supporting 60+ microservices, contributing to DevSecOps automation, CI/CD pipelines, cloud security practices, and RAG workflows to enable reliable, secure, and scalable software delivery.

I build secure, AI-ready cloud platforms where platform engineering, security, and machine learning infrastructure converge.

Core Skills

- Cloud Architecture, DevSecOps, SRE, Kubernetes, Docker
- AI/ML, GenAI, LLM pipelines, MLOps, RAG, Agentic AI
- CI/CD, Distributed Systems, IoT Platforms
- Observability, AIOps, SIEM, Incident Response
- Data Pipelines, Feature Engineering, Model Deployment
- Secure Software Development, Python

Self-Directed Professional Development

- IBM Generative AI Engineering (In Progress)
- PGP Data Science & Business Analytics
- AI & Deep Learning Specialization
- Applied DSPM Series (5 public GitHub repos with end-to-end pipelines and validation artifacts)
 - Zero Trust Data Exposure Lifecycle
 - Subnetting Exposure Graph

Professional Experience

IBM | Sr Backend Engineer | 2021-2025

- Owned and operated 60+ Kubernetes-based microservices, enabling telemetry-driven monitoring and automated remediation
- Strengthened CI/CD via Kubernetes + Tekton pipelines with IAST/SAST/DAST (SonarQube, Mend)
- Built 200+ Python automation tests from scratch to improve CI/CD reliability; collaborated on Ansible automation.
- Led vulnerability management incl. PCE, patching, bi-weekly prioritization
- Achieved ~85% reduction in vulnerability backlog (200+ → 30) over 6 months by leading prioritized patching and partnering with Security teams.

Exabeam - San Mateo, CA - Senior Software Quality Engineer | Aug 2019– Mar 2021

- Led reliability engineering for behavioral security analytics platforms.
- Built automation frameworks validating ingestion pipelines.

Oracle (OCI) - San Jose, CA - Principal Software Engineer | May 2018– Jul 2019

- Architected multi-tenant leaf-spine infrastructure across global data centers.

Light - Redwood City, CA - Senior Software Quality Engineer | Jun 2017 – Apr 2018

- Engineered automation frameworks validating computational photography systems.

Silver Spring Networks - Senior SDET | Nov 2012 – May 2017

- Built CI automation for IoT smart-grid systems supporting 23M+ devices.

Redwood Systems - Senior SDET | Jan 2011 – Oct 2012

- Led automation for smart lighting platforms.

CDNetworks - QA Manager | Aug 2009 – Dec 2010

- Directed validation for distributed CDN infrastructure.

Vusion Systems – Senior QA Manager | Apr 2007 – Jul 2009

- Led QA delivery for HD video streaming platforms.

HP – Senior Software Engineer | Aug 2006 – Mar 2007

- Validated enterprise ALM platforms and database archival workflows.

Motorola PCS – Senior Software Engineer | May 2003 – Jul 2006

- Developed automation for J2ME and Linux mobile platforms.

Brocade – Senior QA Lead | Apr 2002 – Apr 2003

- Led testing for enterprise networking platforms.

Xoriant – Senior Technical Consultant | Jun 1998 – Mar 2002

- Delivered development and QA solutions across networking systems.

DSS Infotech – Senior IT Analyst | Feb 1995 – May 1998

- Designed enterprise database architectures.

Certifications

- DSPM Architect (Cyera) 2026
- Kubeflow - AIML Toolkits (Linux Foundation) 2025

Education

Master of Computer Management (MCM) – Savitribai Phule Pune University, Pune, India – 1993–1995
